

McCue Corporation

# Cart**Stop** LDP

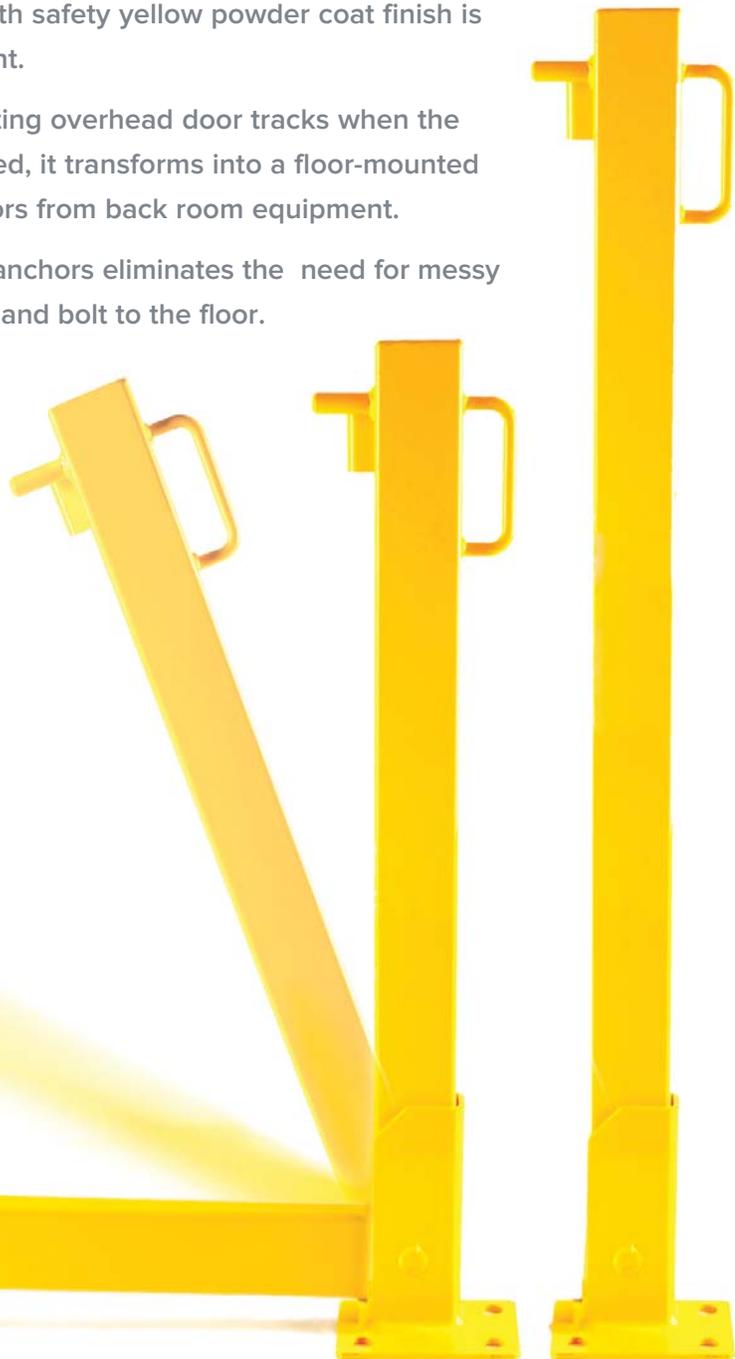

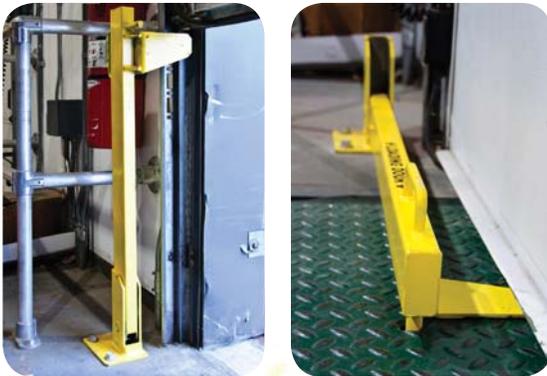

Are you tired of runaway pallets, stock carts or fork lifts banging into the loading dock or back room doors? CartStop loading dock door protector is the two-in-one product that protects both the overhead door panels as well as the door tracks from damaging blows - saving you money on costly repairs.

**STRONG:** Heavy-duty steel construction with safety yellow powder coat finish is impact resistant to warehouse equipment.

**INNOVATIVE:** LDP acts as a bollard protecting overhead door tracks when the gates are up. When the gates are lowered, it transforms into a floor-mounted rail - protecting expensive overhead doors from back room equipment.

**SPEEDY INSTALL:** Self-threading concrete anchors eliminates the need for messy adhesives or quick-set cement. Just drill and bolt to the floor.
